BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

PROPOSAL OF A NEW NAME FOR *PHYLLODROMUS* DELEON, 1959  
(ACARI: PHYTOSEIIDAE), A JUNIOR HOMONYM OF *PHYLLODROMUS*  
JIMÉNEZ DE LA ESPADA, 1875 (ANURA: DENDROBATIDAE)

De Leon (1959) described the genus *Phyllodromus* with the type species, *Phyllodromus leioidis* De Leon, 1959, a phytoseiid mite [Acari: Mesostigmata] distributed in the state of Florida, USA. This genus remained monotypic for four decades. Moraes et al. (1997) described a second species (*P. trisetatus*) from the state of Bahia, Brazil. No other species has been described in, or assigned to, this genus.

During a recent revision of the taxonomy of Dendrobatiidae (Amphibia: Anura), we detected that *Phyllodromus* De Leon is a preoccupied name created by Jiménez de la Espada (1875) for a genus of frogs (Type species: *Phyllodromus pulchellum*). Hence, *Phyllodromus* De Leon, 1959 (Acari: Phytoseiidae) represents a junior homonym of *Phyllodromus* Jiménez de la Espada, 1875 (Anura: Dendrobatiidae).

We propose here *Leonacarus* **nom. nov.** for *Phyllodromus* De Leon, 1959, in application of the International Code of Zoological Nomenclature (ICZN 2000). The name refers to "the mite of Leon" acknowledging De Leon who described and recognized this taxon as a separated genus. The species currently included in *Leonacarus* are *L. leioidis* (De Leon, 1959) **comb. nov.**, and *L. trisetatus* (Moraes & Melo, 1997) **comb. nov.**.

#### SUMMARY

*Phyllodromus* De Leon, 1959 (Acari: Phytoseiidae) is a junior homonym of *Phyllodromus*

Jiménez de la Espada, 1875 (Anura: Dendrobatiidae) and in application of the International Code of Zoological Nomenclature we propose the name *Leonacarus* **nom. nov.** for *Phyllodromus* De Leon, 1959. The species currently included in *Leonacarus* are *L. leioidis* (De Leon, 1959) **comb. nov.**, and *L. trisetatus* (Moraes & Melo, 1997) **comb. nov.**

We thank J. De Marmels, L.J. Joly (Instituto de Zoología Agrícola, Facultad de Agronomía, UCV), I. de la Riva (MNCN), and M.A. Alonso Zarazaga (MNCN, ICZN) for comments on the manuscript.
