The success of the three RAP surveys reported here was the result of exceptional support from a large number of individuals and organizations. The 2009 Nakanai Mountains and Muller Range surveys were a collaboration between Conservation International, A Rocha International and Papua New Guinea Institute of Biological Research (PNGIBR) and funding was provided by a generous grant from the Hans Wilsdorf Foundation. Kristen Williams (CSIRO) and Randal Storey (CI) undertook the Gap Analysis modeling that initially identified these high priority sites.

The 2008 Wanakipa and 2009 Muller Range RAP surveys, both in the upper Strickland Basin, were also supported by generous financial and logistical support from Porgera Joint Venture (PJV; of Barrick Gold) and we are extremely grateful to Tim Omundsen, Jim McNamara, Bruce Ambrose, Max Kuduk, Gabriel Tru, Riall Gabuogi, and Scott Whitney of PJV's Environment Department. The PJV Community Affairs personnel were also most helpful in providing liaison with local communities. For their hospitality in inviting us to work on their land we express our deep gratitude to the landowners of the Kai-ingri area of the Kaijende Highlands including Iba Kule, Karu Ogogo, Ukupa Nangalin, Ake Ayura, Mambel Yanale, Manase Kule; to the landowners of Paiam Forest from Suyan Village, particularly Pingisa Saiké and Yainé Ribson, and to the Hewa community of Wanakipa including our assistants Wapu, Fimo Aini, Kaipas Kalbus, Lau Ainam, Tepa Napim, Joseli Khapiap, Axel Aini, Yakuap, Nim Kabib, Suwiap Aini, Patrus, Balus Alulu, Aislan Tama, Inian Tai, Loni Nablio, Telian Fafa, Toap Aini, Saimon Toap, Jemis Telian, Devid Toap, William Wagapu and Ken Thupian.

The April 2009 survey in the Nakanai Mountains received tremendous support from local communities around Pomio and we are extremely grateful to Alois Magogo of Pomio Local Level Government and Florence Pasparea of East New Britain Provincial Government's Environment and Conservation Management Committee for providing logistical support and encouragement, and to our wonderful assistants from Irena Village: Michael Bari, Edward Ravunan, Ignatius Tiling, Melki Totona, Bonny Watiau, Augustine Lonapel, Tom Lonapel, Dennis Ravunan, Peter Unria, Francis Lou, Alois Magogo, Dianne Kalat, Patricia Lonatugu and Rosa Kesal; from Marmar Village: Leo Maliu, Nickolaus Tande, Norbert Opsil, Markwel Lasisi, Michael Tolepun, John Rogi, Esorom Borega, James Maiskale, Victor Melel, Emil Mei, Mathias Pameo, Thadius Male and Daniel Borega; and from Muru (Muro) Village: Jerome Lolomo, Ben Ipa, John Baloupita, and Francis Vavage.

Likewise the communities of Tobu in Western Province and Aluni in Southern Highlands Province in the Muller Range generously allowed us to work on their land and provided not only assistance with our work but freely shared with us their extensive knowledge about the fauna and flora of their lands. We are particularly grateful to Yuropi Weli, Amos Ulate, Yalupa Akisi, Jansen Kolako, Nux Tupis, Jack Mayupi, Benson Olako, Eka Kiapa, Abram Paiapu, David Paiapu, Robert Yaluba, Woita Sialeme, James Bile, and Aroma Kirupa from Tobu Village, and to Philip Sukayu, Gunipa Waki, Kilaye Hau, Arape Kiks, Kaiape Iki, Walo Yawi, Ariye Tagi and Shandrick Robin from Aluni Village.

Modi Pontio, Victoria Niesi, Kepslok Kumilgo, Tamalis Akis, Teneke Tafatu, David Mitchell, Geraldine Dukaduka and Warren Jano of CI-PNG provided numerous courtesies, often at
